## **THIS IS AN AMAZING CONVEYOR DRYER AT A GREAT PRICE!**

If you're tired of under-cured plastisol or you want to add water-based and discharge printing to your repertoire, break open your piggy bank and buy this dryer. Hands down, it is the best piece of equipment that I purchased for my screen printing business. I used it every day for 3 years and only had to replace the temperature control relay one time. (It now has Vastex's newer, more reliable relay installed.) Now I'm closing my production facility, and I have to sell it. Everything -- from the belt to the heaters to the control box -- looks great.

In my opinion, you would be lucky to find another dryer this nice at such a great price.

### **Manufacturer's Description**

BigRed V Series dryers are high performance machines offered in 30" and 54" belt widths, each with 3 or 4 heaters per chamber.

All BigRed dryers feature digital temperature control, air cooled skin with filtered intake, separate make up air system, powered negative air exhaust, and cooling tray at exit.

### **CURE TIMES:**

Plastisol  
475+ shirts/hr

Water Based  
175+ shirts/hr

**Electrical Requirements: 240V / 42A / 1 Phase / 3 wire / 50/60 HZ**
