

AIR PonyDryer

AP-2006

AP-3607

AirPony™ Conveyor Oven

Count on 'em. These quality designed dryers are big on production and small on space. They are loaded with convenient features and priced to fit any budget. Air PonyDryers operate with digital controls for the heater setting and the belt speed. These machines feature intake fans and exhaust fans that move air safely away from the operator but do not require custom ventilation within a building.

Reliable cal-rod style heaters that easily adjust in height and industrial level construction provide these units with the durability found in our larger conveyor ovens. AirPony dryers give additional value with their crowned rollers for perfect tracking on the fiberglass coated belt.

If you are looking for premium level construction and reliability on a smaller scale, then the AirPony is the right choice for your shop.
