UV EXPOSURE UNIT

USED Pricing

The Point 1000 Screen Exposure Unit provides high resolution screens at an affordable price by bringing together the best of 2 different Screen Exposure light sources. The 1000 watt Halogen Point Light Source enables you to capture halftones and fine lines while the UV Fluorescent Lights help speed exposure. These features combined with a Digital Timer and Extra Large Screen Capacity make the POINT 1000 an ideal choice for screen printers seeking higher quality and increased throughput. The Two-Part Cabinet design enables this unit to fit through a standard doorway.

SCREEN DRYER

Hix SD-2632 Screen Drying Cabinet
\$2,150.00

To get the fastest turn-around and produce more, you have to save time wherever possible.

The HIX SD-2632 screen drying cabinet is designed to do just that. Eight innovative, angled drying racks are designed to maximize air flow and dry both coated or received screens faster with its filtered air delivery system. The SD-2632 not only cut drying time by hours but will also nearly eliminate the time-consuming task of fixing pin holes. Optimally spaced air knives are set into the corrosion-resistant galvanized walls to deliver even-heated air across the screens. Use the 37" X 35 1/2" counter top as a space-saving table for your HIX TT-180 exposure unit. The maximum temperature inside the cabinet is 30° above room.
